MITO

LTF/EN A

technical highlights of *MITO*

The MITO introduces a new way of how to learn to paraglide: Extremely easy in take-offs in all wind conditions- on the mountain as on the winch. It`s handling and climbing performance in thermals is excellent and therefore offers - in addition to it`s high passive safety - wide scope to it`s pilot to learn, to experiment and even to educate himself.

Full of innovations, SWING presents with the MITO the brand-new Ram Air Section Technology for the first time.

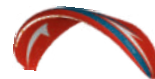

RAST gives the MITO a unique easiness in take-offs and stability before and while experiencing a canopy softness.

- double 3D-shaping on leading and on trailing edge
- patented technology: RAST or „the“ wall for better inflation and hindered deflation
- shark nose profil: changing fluently into a low drag profile at the stabilos
- mini ribs with internal seams
- hybrid 3-liner guarantees easy and fast preparing for take- offs
