TWIN RS 2

Bringing passion and joy to something will produce the best results. Our new TWIN RS 2 was developed by an experienced team of professional tandem pilots. Their goal was to create a completely reliable piece of equipment for daily use, which can be relied on 100% from launch through to landing.

We have optimised our tried and tested RAST system specifically for the particular demands of tandem flying. It helps you deal confidently with even challenging situations and gives your passenger a safe and unforgettable flying experience.

And because we believe that work should also be fun, the TWIN RS 2 is equipped with playful and effortless handling, which guarantees good times.

harmonious inflation behaviour without unintentional launch, thanks to RAST
extremely good flare behaviour, even in nil wind
consistent flight characteristics across the entire recommended weight range, thanks to RAST

LTF/EN B

- RAST optimised for this tandem for easiest launch and flair during landing
- Nitinol rods for easy folding and durability of the nose
- NCV Skytex material for maximal durability and profile accuracy
- improved basic shape for better handling and little brake pressure
- new innerlife construction for better climbing in thermals
- all ribs and V-parts are reinforced for maximum durability
- extremely easy to use and smooth-running handle for Big Ears
